Practical Guide:

- access the platform
- learning the structure of courses
- how to complete them
- how to receive the final certificate

Registration

To begin, go to the main page of the Moodle EcoFarm4Prisons platform:

<https://www.ecofarms4prisons.eu/moodle>

Select the language of interest from the list of categories

The screenshot shows the homepage of the EcoFarm4Prisons Moodle platform. At the top, there is a logo with a green apple icon and the text "ECOFARMS 4 PRISONS". Below the logo is a green navigation bar with the word "HOME" in white. The main content area features a large image of a vineyard at sunset with birds flying in the sky. Overlaid on the image is the text: "COOPERATION FOR THE IMPROVEMENT OF SUSTAINABLE AND ORGANIC SOCIAL FARMING PRACTICES IN PRISONS". Below the image, there is a section titled "Course categories" with a list of languages: English (3), Portuguese (3), Italian (3), Deutsch (3), and Turkish (3). Each language is preceded by a small green folder icon.

🗨 Announcements

> Unit 1: Introduction to Organic Farming 🔒

> Unit 2: Concepts, Principles and Effects of Regenerative Agriculture 🔒

> Additional Materials 🔒

Each Module consists of Units containing teaching materials and activities for the student, plus a general section devoted to any announcements.

Units will unlock as the student completes the activities in the previous one.

Completion of activities and modules

Unit 1: Introduction to Organic Farming

Organic farming is committed with four principles: health, ecology, fairness and care (International Federation of Organic Agricultural Movements, IFOAM) and the Organic farming systems aim to put these principles into practice. Organic production is an overall system of farm management and food production that combines best environmental and climate action practices, a high level of biodiversity, the preservation of natural resources and the application of high animal welfare standards and high production standards in line with the demand of a growing number of consumers for products produced using natural substances and processes. Organic production thus plays a dual societal role, where, on the one hand, it provides for a specific market responding to consumer demand for organic products and, on the other hand, it delivers publicly available goods that contribute to the protection of the environment and animal welfare, as well as to rural development (Regulation (EU) 2018/848).

Available from 2 June 2025
